

BLACKPOINT CYBER MDR

## Disrupt the hacker timeline now

Blackpoint Cyber's 24/7 managed detection and response (MDR) platform combines network visualization, tradecraft detection, and endpoint security to rapidly detect and neutralize lateral movement in its earliest stages.

Faster than any other solution on the market, Blackpoint's technology harnesses metadata around suspicious events, hacker tradecraft, and remote privileged activity to catch what others miss and take real action before cyber threats can spread.

### THE THREAT LANDSCAPE — A STARK REALITY

**\$200,000**

Average cost of a data breach for companies of all sizes

**90%**

of breaches occur outside of working hours

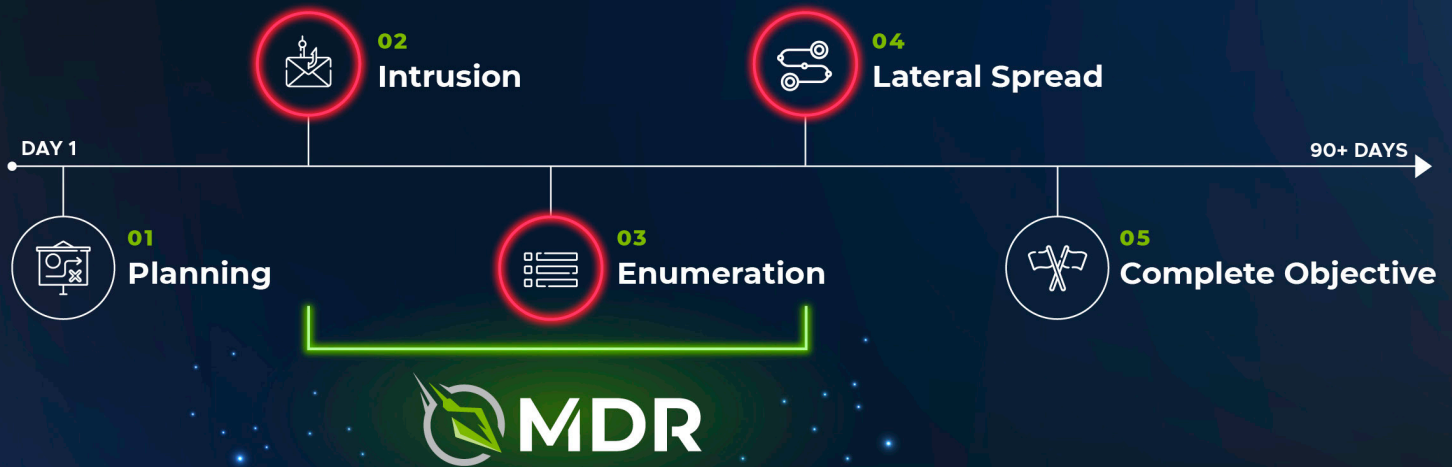

## Cyberattackers have you in their sights. What's your next move?

The only constant in the threat landscape is that it is always changing. As threat actors increasingly target small to medium-sized businesses, building up a strong cybersecurity strategy is crucial. Don't bulk up your security stack with ineffective, non-scalable tools. Take a proactive, offensive approach to stay ahead of cybercriminals by adding continuous monitoring, real-time threat detection, and active response to your arsenal.

At Blackpoint Cyber, we win the unfair fight by giving hackers hell and helping our businesses protect what's most important to them. **Our mission?** Provide unified, 24/7 Managed Detection and Response services to organizations around the world.

# Blackpoint vs The Hacker Timeline

When an attack occurs, detection and response times determine whether attackers succeed in their efforts. Blackpoint offers true, 24/7 MDR fights back threats within minutes and closes the gap between the identification of an event and the actual response and remediation. By immediately isolating endpoints, Blackpoint's technology stops the threat from moving laterally into other systems.

## See How We Fight

### Patented Real-Time Threat Detection

Blackpoint Cyber catches them fast and hits them hard. Through their proprietary security operations and incident response platform, SNAP-Defense, Blackpoint's world-class SOC hunts for active threats in your environment and neutralizes them in their earliest stages. Their technology is built from the ground up to give their analysts the ability to continuously monitor and respond to the modern threat landscape.

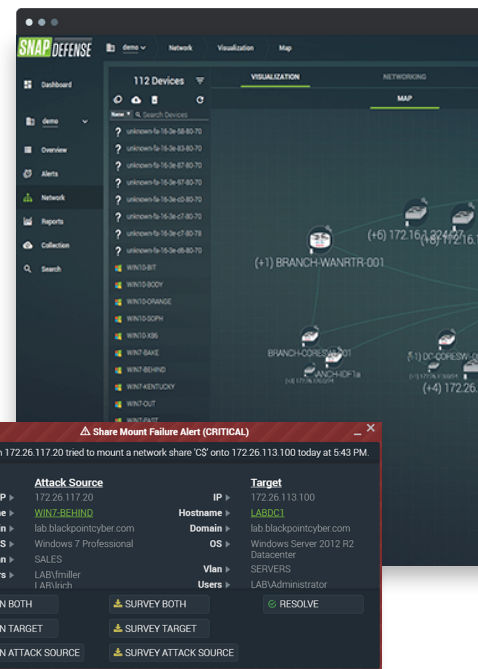

### 24/7 Incident Monitoring & Response

Established by former US government cybersecurity operators, the Blackpoint SOC leverages its deep knowledge of hacker tradecraft and real-world cyber experience to provide 24/7, unified detection and response services. Blackpoint's fully managed SOC team monitors your unique environment around the clock so you can focus on running your business.

### Rapid Agent Deployment

Blackpoint's world-class, nation state-grade cybersecurity ecosystem is designed to serve businesses by completing the hard work for you. While other services on the market take days and weeks to tune events, they offer same-day agent deployment and start protecting your diverse environments within minutes. Trust Blackpoint Cyber to provide a streamlined onboarding experience so you can get coverage without compromising your efficiency.

## See Blackpoint MDR in action

Rely on Blackpoint for effective, high-performance, and robust cybersecurity that protects against today's and tomorrow's threats.
